

Group29 – COMP5047 Applied Software Engineering

At the beginning of the coursework, our group agreed to use a WhatsApp chat as our main communication channel. All members already had WhatsApp installed, which made it the most convenient option. The chat was used for sharing updates, asking questions, arranging meetings, and resolving design issues throughout the semester. We also met weekly during the scheduled Tuesday practical session. These meetings were used to set agenda, review progress, clarify dependencies between subsystems, and plan the upcoming tasks.

Alongside WhatsApp, we used a shared GitHub repository for all documentation and modelling files. This helped us manage versions of our diagrams and track changes across the coursework.

Github Repository link:

https://github.com/19343387-areebah-khan/COMP5047_CW_G29.git

Folder / File	Description
G29-meetingmins	All meeting agendas and minutes for each week. Used to document attendance, progress, and planned actions.
Member G29 19238600	Papyrus PNG files and documentation for the Society Leader App subsystem.
Member G29 19323083	Folder allocated for USU Student App. Includes report.
Member G29 19343387	Papyrus model files and documentation for the USU Operation System subsystem.
G29 TeamPart	Combined architectural design for the full system and team report.

Team Operation

Date	Venue	Time	Chair	Attendance	Topics Discussed	Minutes URL
23/09/25	Google Meet	15:00	19343387	All members present	Intro, subsystem allocation, contact exchange	week1
30/09/25	Practical Room	15:00 - 14:30	19343387	19238600, 19323083, 19343387	Requirements review, dependencies	week2
07/10/25	Practical Room	15:00 – 14:30	19343387	19238600, 19323083, 19343387	Class diagrams, early architecture	week3
14/10/25	Practical Room	15:00 – 16:30	19343387	19238600, 19323083, 19343387	Activity diagram cross check advice	week4
21/10/25	Practical Room	15:00-16:30	19343387	19238600, 19323083, 19343387	Consolidation, catch up so we are in the same place	week5
28/10/25	Practical Room	15:00-16:30	19238600	19238600, 19323083, 19343387	Assign tasks for 4b and finalising task 3	week6
04/11/25	Google meet	14:00-15:45	19323083	19238600, 19323083, 19343387	Clarification of microservices	week7
11/11/25	Google Meet	15:00-17:00	19238600	19238600, 19323083, 19343387	Review of task 4a and planning 4b	week8
19/11/25	Google meet	15:00-16:00	19323083	19238600, 19323083, 19343387	4b, agreed to finalise all diagrams, whatsapp to discuss task 5.	week9

Throughout the coursework, the team collaborated well and maintained consistent communication. Members 19238600, 19343387 and 19323083 participated actively in meetings and contributed reliable work toward their subsystems. Group discussions were respectful and solution-focused, especially during architectural integration.

Participation varied slightly toward the end of the project, and the group adapted by adjusting responsibilities so that the shared components and integrated architecture could still be completed on time. Cross-checking was done mainly during meetings, where members reviewed each other's diagrams to ensure consistency in naming, interfaces, and interaction flows.

Overall, the team demonstrated effective communication, shared responsibility, and a collaborative attitude across the project, which helped maintain steady progress and coherence in the final system design. Alongside this the group helped aid each other even in their individual task, offering advice and guidance.
